YOU THINK OF CUSTOMS? WE HAVE SOLUTIONS!

The complexities of global trade can be overwhelming. And yet keeping abreast of the latest customs regulations and customs initiatives is vital to ensuring the smooth flow of goods across international borders. One business that knows more than most about this crucial area of the export and import processes is MIC Customs Solutions.

MIC Customs Solutions is the worldwide leading provider of global customs software solutions ensuring efficient customs processes and compliance within the legal frameworks in 45+ countries on five continents.

Our 700+ multinational clients – many of them in the automotive industry – achieved tremendous cost savings and transparency in the customs supply chain through integrating and automating customs processes. According to a study conducted by an independent market research institute, MIC is the number one global customs software provider in the automotive industry reflecting our 20+ years of experience exclusively in this area.

MIC's software products are offered as in-house or as Software-as-a-Service solution (SaaS). MIC provides one system, one customs database, one user interface, one maintenance and support centre – worldwide.

MIC's Global Trade Management (GTM) platform is covering the entire world of customs software solutions:

- Multi-country import and export customs clearance with direct electronic communication to the national customs administrations' systems

- Single Authorization for Simplified Procedures (SASP)
- Bonded warehouse, inward processing relief (duty drawback and suspension), Outward processing relief, processing under customs control, free trade zone
- Automatic conversion of export data into import data – Global Trade Data Chain (GTDC)
- Intrastat reporting (for all 27 EU member countries), New Computerised Transit System (NCTS), Excise Movement Control System (EMCS)
- Export control management including denied party screening, license determination, embargos and sanctions, etc
- Rules-based classification automation (Global Product Classification)
- Automated origin calculation and supplier solicitation (70+ FTAs fully supported)
